

SPCC Compliance Overview

Proactive Testing, Clear Reporting, and Regulatory Peace of Mind

Stay Ahead of Spill Prevention Requirements

FuelCare helps you meet EPA SPCC regulations with certified testing, clear documentation, and fast turnaround — so you're always inspection-ready.

FuelCare helps you avoid these risks by proactively documenting the required inspections and testing needed to satisfy EPA expectations.

What to Expect

Schedule & Site Review

We evaluate your system type, location, and the testing requirements that apply.

Onsite Testing

Our certified technician arrives and performs all necessary testing with minimal disruption.

Reporting & Documentation

Receive regulator-ready, photo-documented reports within 48 business hours.

Regulatory Filing

FuelCare submits required compliance reports directly to state agencies—so you stay compliant without the paperwork.

Stay on Track

We keep tabs on your testing deadlines and send reminders so nothing slips through the cracks.

Need Help with SPCC-Related Testing?

Let FuelCare handle the inspection, testing, and documentation — so you can stay focused on operations.

OUR ANNOTATED REPORTS, FAST TURNAROUND, AND ONLINE CLIENT PORTAL MAKE IT EASY TO TRACK THE TESTING AND MAINTENANCE NEEDED TO KEEP YOUR SPCC PLAN UP TO DATE.

What is SPCC?

SPCC stands for **Spill Prevention, Control, and Countermeasure**. It's a federal regulation enforced by the **EPA** that applies to facilities storing significant quantities of oil or fuel.

The goal: **prevent discharges into navigable waters or shorelines.**

Who Must Comply?

You may be required to maintain an SPCC Plan if your facility:

- Stores **1,320+ gallons** of oil/fuel in **aboveground containers** (each 55 gallons or larger), OR
- Stores **42,000+ gallons** in underground tanks **not regulated by UST rules**

Why It Matters

Non-compliance can result in:

- Fines from regulators
- Reputation damage
- Environmental citations
- Delays in construction or permitting

Common Impact Sites

- Hospitals & healthcare campuses
- Data centers & telecom
- Municipal facilities
- Fuel distributors & fleets
- Airports & transportation hubs

Why FuelCare

While we don't create SPCC plans, FuelCare supports plan requirements and audit readiness:

- Spill Bucket Testing
- Overfill Prevention Equipment Testing
- Secondary Containment Verification
- Fuel System Inspection & Photo Documentation
- Leak Detection Equipment Testing
- Detailed Reporting Accepted by Regulators
